EDUCATION

B.Tech Computer Science, Kalasalingam University Expected 2025*
CGPA: 8.28

Senior Secondary, NM Boys HSC Bandipora 2020
JKBOSE: 87

Matriculation, Govt. High School Bagh Bandipora 2018
JKBOSE: 84

SKILLS

Programming Languages	Java, Python
Database	MySQL, MongoDB
Web Development	HTML, CSS, JavaScript
Frameworks and Libraries	ReactJS, Express JS, Tailwind CSS, GSAP
Tools	VS Code, Lightroom, Figma
Cybersecurity	Vulnerability Assessment, Penetration Testing

EXPERIENCE

Infoziant Security, Chennai, India DEC 2023 - Present
Student Intern

- Actively participating as a research cluster member, specializing in web application security.
- Gaining hands-on experience and mentorship in the field of cybersecurity.
- Engaging in practical projects to enhance knowledge and skills.

PROJECTS

Web Development Projects

- **Frontend Clones** [\[GitHub\]](#)
A collection of frontend clones of various websites, built using HTML, CSS, JavaScript, React and Tailwind CSS. This project demonstrates proficiency in creating static and interactive web pages, replicating the design popular websites.
- **Landing Pages:** [\[GitHub\]](#)
A collection of landing pages for various websites, built using HTML, CSS, React and JavaScript. These projects demonstrate proficiency in creating static and interactive landing pages, replicating the design and functionality of popular websites' landing sections

- **StayVista**

[\[GitHub\]](#)

A full-stack web application using Express, MongoDB, CSS, Bootstrap, and JavaScript, for users to list accommodations for rent similar to Airbnb. Features include secure user authentication, detailed accommodation listings, responsive design and dynamic content. This project highlights my skills in creating user-centric, robust applications with comprehensive data validation and error handling

Automated Web Application Vulnerability Scanner

[\[GitHub\]](#)

Developed an Automated Web Application Vulnerability Scanner using Python that extracts URLs from a given webpage, stores them in a MongoDB database, and scans for SQL injection, cross-site scripting (XSS), and cross-site request forgery (CSRF) vulnerabilities to identify potential security risks.

Email Guard

[\[GitHub\]](#)

- Utilizes the emailrep.io API to retrieve reputation data for email addresses.
- Implements a web interface with Flask, allowing users to input an email address and check its reputation.

Domain Detective

[\[GitHub\]](#)

- Retrieves information such as registrar, creation date, expiration date, name servers, and more.
- Provides the IP address and geographical location of the domain.
- Fetches security information from VirusTotal, including malicious, suspicious, harmless, and undetected status.

CERTIFICATIONS

- Cybersecurity Essentials from CISCO
- Get Started With Figma from COURSERA
- AI Tools workshop conducted by be10x

LEADERSHIP

- **Leader at the OWASP Student Chapter, Kare** Sept 2023 - present
Owasp Kalasalingam ([OFFICIAL WEBSITE](#))([Github REPO](#)) *India*
- Led the OWASP Student Chapter at Kalasalingam University, organizing multiple online and offline events, including workshops and webinars, to enhance cybersecurity knowledge.
- Collaborated with industry professionals to provide valuable insights and networking opportunities for chapter members, significantly growing the community.
